

Jolly Songs Fix

To solve the issue we've seen where Jolly Songs doesn't load properly, we've discovered a quick fix whilst we're working on an update.

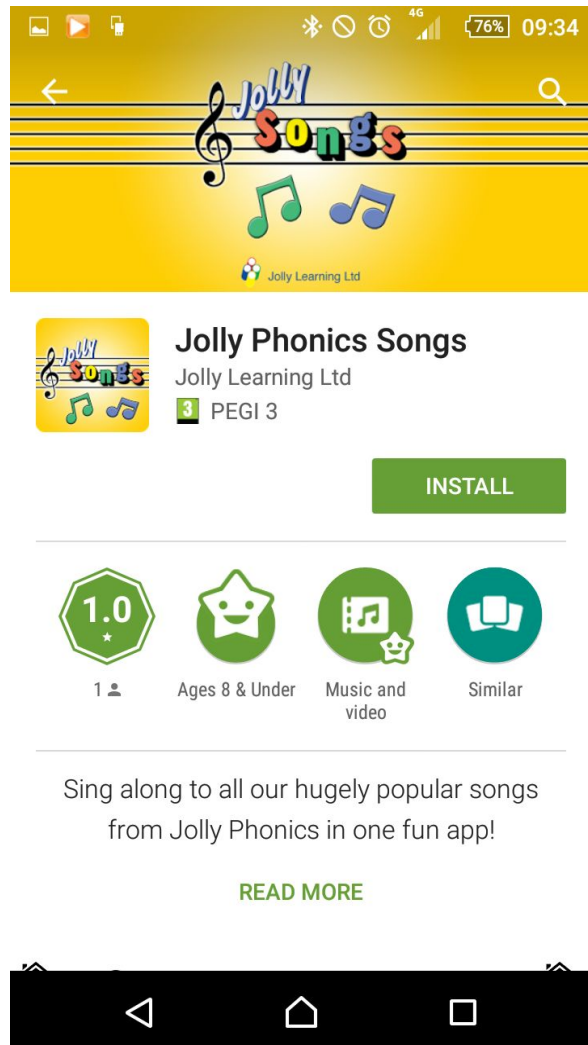

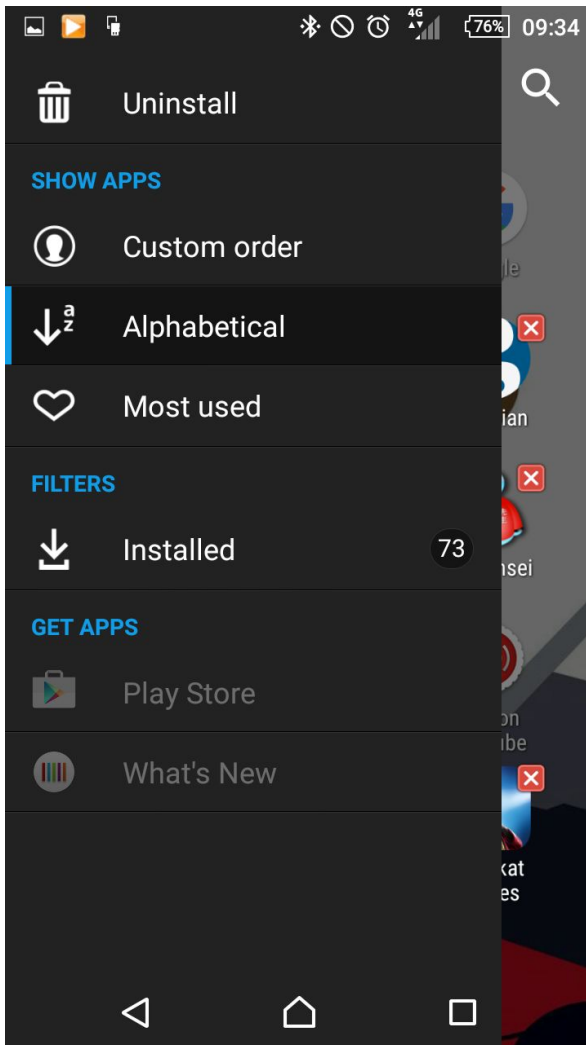

To start with, we're assuming that your language **IS NOT** set to English (United Kingdom) or English (United States). To check your current language, go to **Settings > Language & Input > Language** and you should see what your language is currently.

What you need to do is change the language to **English (United Kingdom)**. *(Don't worry, you'll be able to change it back once we're finished!)*

The next thing you need to do is **delete** the Jolly Songs app and then **download it again**.

Now you need to **open the Jolly Songs app**. What you should see is the 'S' song when it loads.

Now the app is working properly, you're free to **change your language settings** back to what they were before.

Please let us know if this doesn't work. Apologies for the delay and we're working hard to get an update launched that fixes this.
